Math
with
Raisins

“Hi, it’s me, ABC Mouse! I love using objects to help me with math, and you can too! You can use all sorts of things, like buttons or marbles, but my favorite is raisins!”

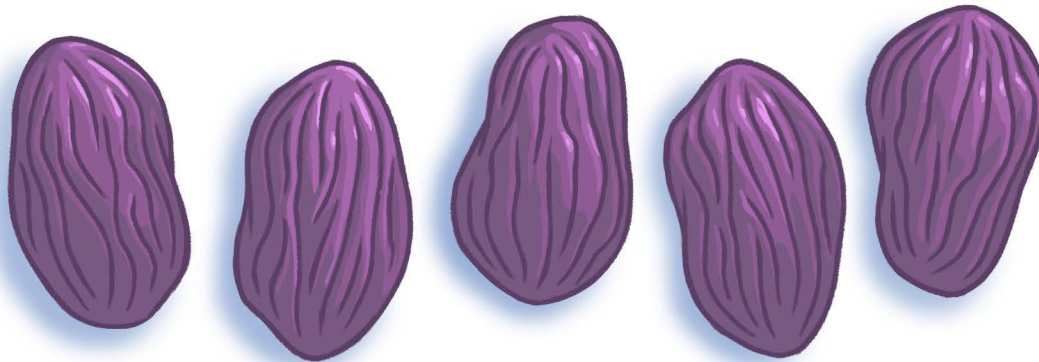

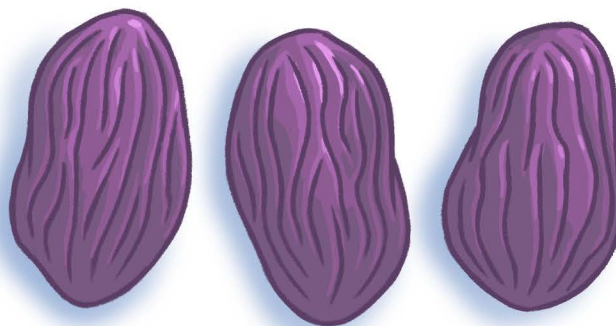

“You can count them. Ready, set, count:

1, 2, 3, 4, 5, 6, 7, 8, 9, 10!”

“You can add them. Here are **5** raisins,
and here are **3** raisins. How many do I
have altogether?”

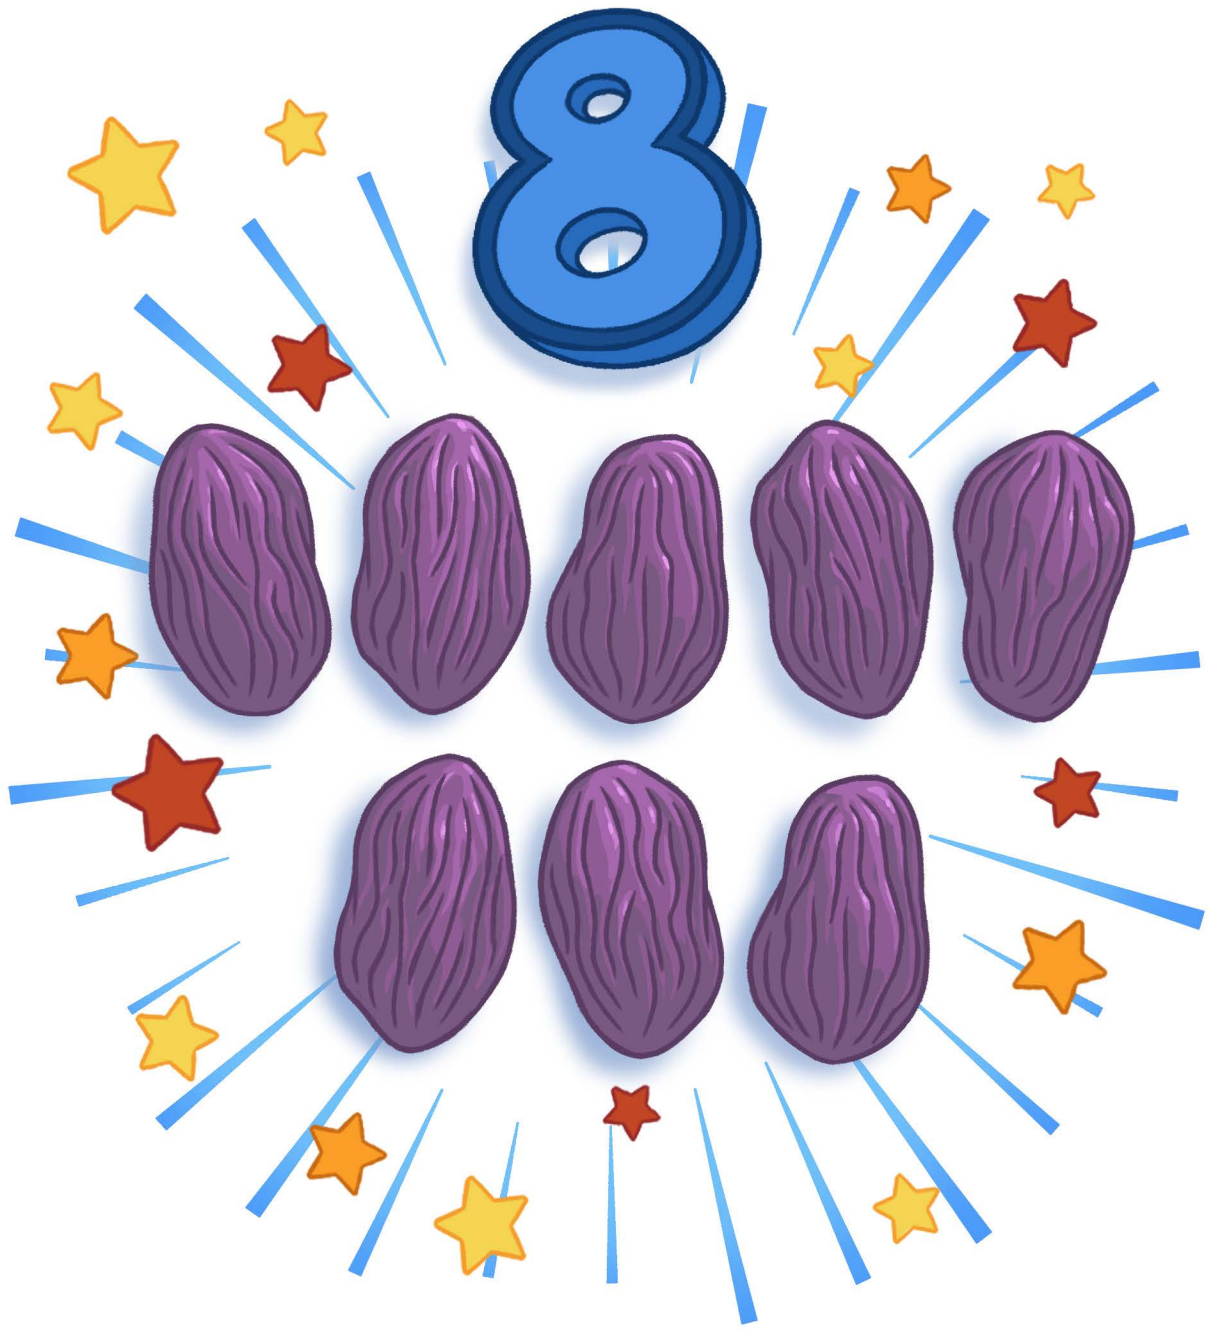

5 raisins

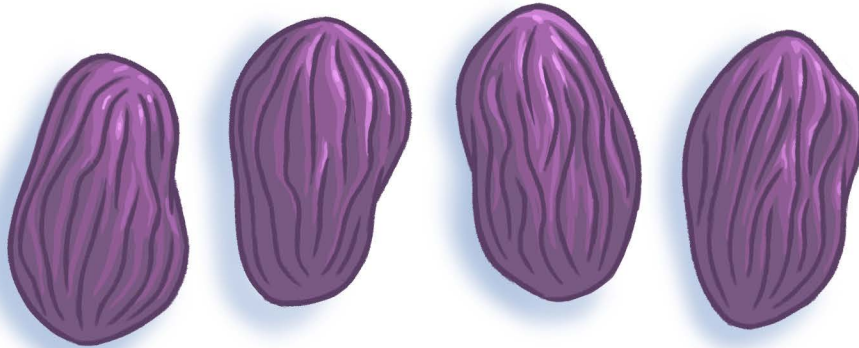

3 raisins

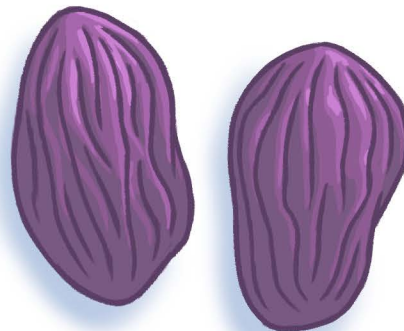

“I have 8! So 5 plus 3 equals 8!”

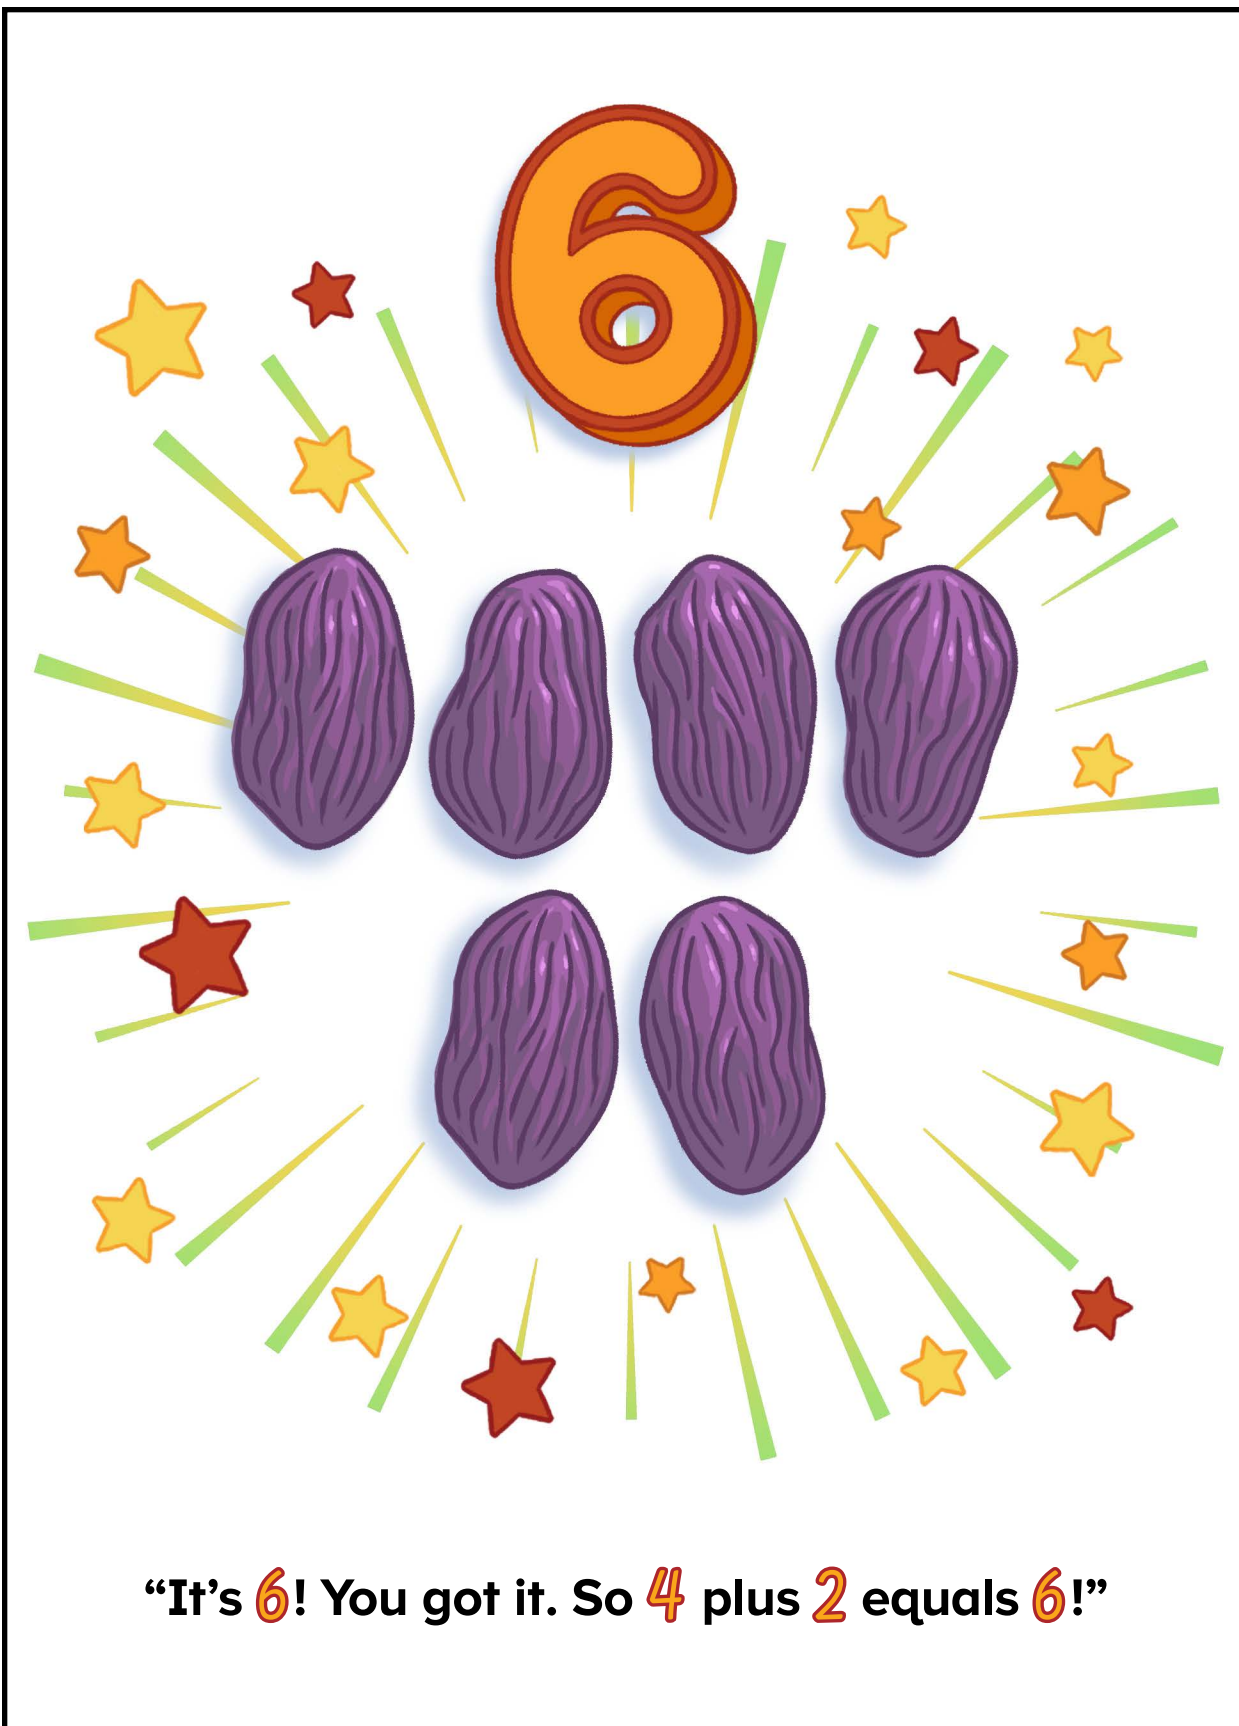

“Let’s add some more! Here are **4** raisins,
and here are **2** more. What does **4** plus
2 equal? Can you guess?”

4 raisins

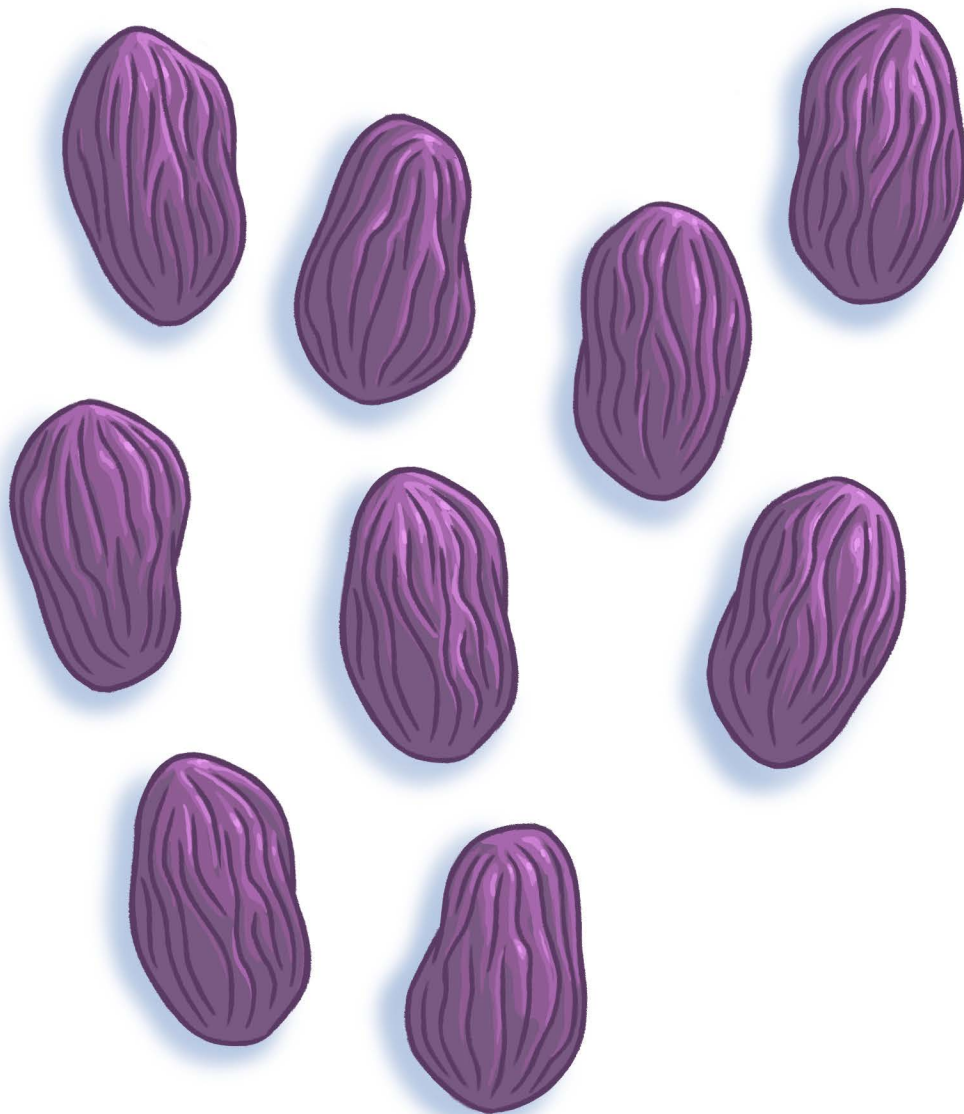

2 raisins

“It’s 6! You got it. So 4 plus 2 equals 6!”

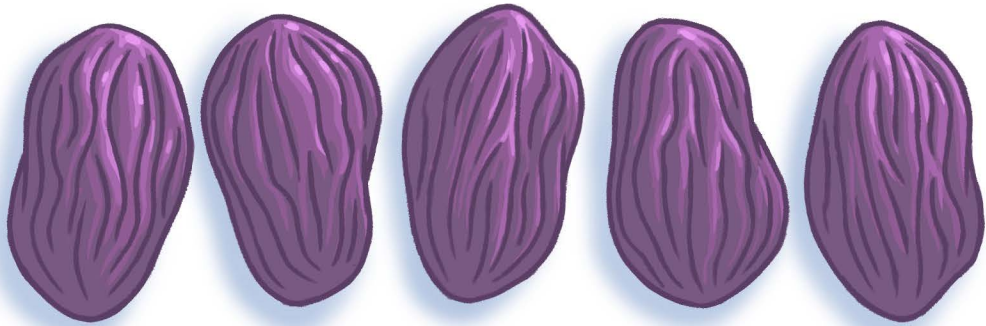

“Now let’s try taking some away. Here are **9** raisins. If I take away **4**, how many will I have left?”

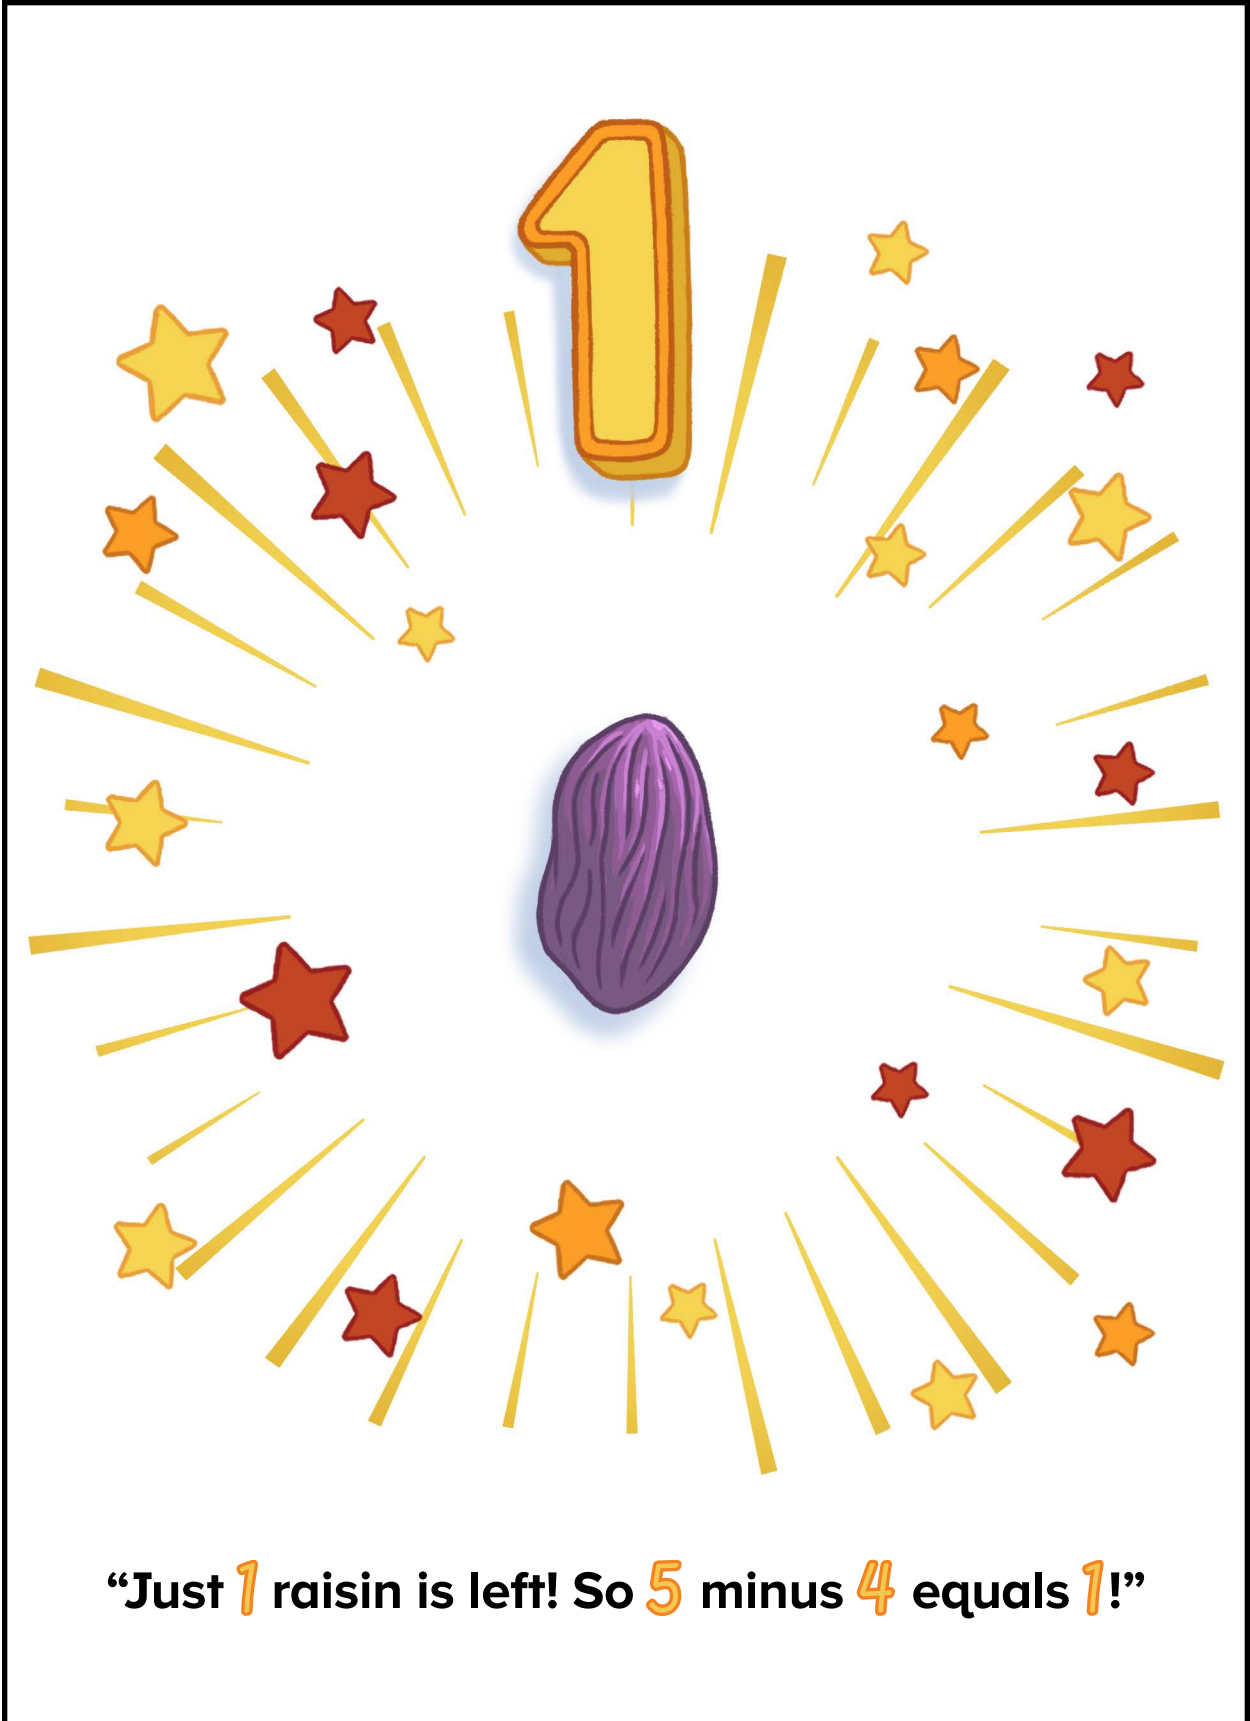

“I will have 5! So 9 take away 4 equals 5.”

“And what if I take away 4 more?”

“Just **1** raisin is left! So **5** minus **4** equals **1**!”

“And now for the yummiest part. We get to eat them! *Mmm, munch, munch!* Math with raisins isn’t just fun, it’s super tasty too!”
